

## **Quality Control Corp Acquires Sauer-Danfoss CP, CGP, CGM & HT Line of Pumps and Motors**

*Harwood Heights, IL, November, 2009* –Quality Control Corp (QCC) has announced that on November 1, 2009 it has assumed the design, manufacture, marketing and distribution of the CP, CGP, CGM & HT line of gear pumps and motors previously manufactured by Sauer Danfoss (SD).

“We at QCC are very pleased to now be able to add this line of high-quality pumps and motors to our product offerings as part of our Orphan Products Program,” said Gregory M. Willard, President and CEO of QCC in making the announcement. “SD and QCC have cooperated to ensure that the transition will be smooth for our customers, and that availability of new pumps, parts and service for existing pumps will continue without disruption, as it did following our earlier acquisition of the Webster pump and motor line in 2004.”

Quality Control Corporation has over 50 years of experience as a manufacturing services provider specializing in the manufacture, assembly and testing of complete products and assemblies, as well as precision-machined components for aerospace, diesel fuel systems, medical, defense, and fluid power applications. QCC's customers include Original Equipment Manufacturers, Distributors and the U.S. Government. Located in Harwood Heights, IL, QCC has more than 120,000 square feet of production capacity in four facilities.

Quality Control Corporation is committed to making this transition smooth for all customers. For assistance during the changeover, customers can call or e-mail the following individuals at QCC:
